

This cancer procedure has been used enough times to convince us that it is the most successful so far for life threatening diseases. Normal flu and colds treatments do not need to be as intense as is described here.

This method uses two different techniques to get the chlorine dioxide into the body. The first technique is what we first called Clara's 6 and 6 protocol. That was where we gave a person 6 drops of MMS with the activation and then waited one hour and then gave another six drops. Many amazing things happened when using this six and six. However the thing that developed from this method was to use the 6 and 6 three times in a day. In the morning, at noon and in the evening before retiring.

The results were in many cases quite amazing as I was mostly suggesting the use of both techniques together. Cancers dried up and tumors simply began falling apart and other problems began to drop away.

You probably know that we don't have any millions or even thousands of dollars for research, but many people do call and I suggest things to do, and some call back to say how they are doing. I base my conclusions on those who call back or those who come by my house in Mexico.

One cannot begin to use the 6 and 6 technique with persons that are very sick. They must be treated very carefully. We usually start new cancer patients that are very sick on 1 drop doses. So we use 1 and 1. That is we do a single drop dose and then wait an hour and then do the second drop dose. We do this in the morning, at noon and at night. That makes for 6 drops during a day for a very sick person. Some people might start at 2 and 2. Again that would be 2 drops and wait an hour and then two more drops. This would be done in the morning, at noon, and then in the evening before bed.

OF COURSE, WHEN I SAY 2 DROPS OR 5 DROPS OF MMS OR ANY OTHER NUMBER I ALWAYS MEAN THAT 5 DROPS OF CITRIC ACID SOLUTION OF LEMON JUICE IS USED WITH EACH DROP OF MMS. ONE THEN WAITS 3 MINUTES BEFORE ADDING JUICE OR WATER TO THE DOSE. ALWAYS, 5 DROPS OF CITRIC SOLUTION OR LEMON JUICE IS ALWAYS ADDED TO EACH DROP OF MMS.

Depending upon how sick the person is, that determines the number of drops to use in the starting doses. A person who is running around OK could be started at 6 and 6 drops doses.

However, no matter how many drops one starts with, if he does not notice any nausea the next day he should increase the number of drops by plus one. If the person started with 6 and 6 then the next day he would go to 7 and 7 three times during that day, and the day after it would be 8 and 8.

Anytime one notices nausea, always drop back a drop or two for up to a day before increasing the drops again. That is the technique for using Clara's 6 and 6 drop doses one hour apart. They should be increased slowly, carefully one drop a day until you are at 15 and 15. It may take a while to get to this point as the cancer should be almost cured by this time. Often the patient will get nauseous and you will have to drop back.

THE BASIC PRINCIPLE FOR ALL LIFE THREATENING DISEASES IS ALWAYS GIVE THE PERSON AS MUCH MMS AS HE OR SHE CAN STAND WITHOUT GETTING VERY NAUSEOUS, OR GETTING DIARRHEA.

THAT MEANS OVER THE COURSE OF THE DAY, NOT JUST ONE BIG DOSE, BUT MANY DOSES OVER THE DAY, USUALLY AS I HAVE DESCRIBED ABOVE. SUCCESS IS DETERMINED BY THE FACT THAT YOU KEEP INCREASING THE DOSE AS MUCH AS POSSIBLE. BUT WHEN NAUSEA SHOWS UP, BACK OFF WITH LESS DROPS.

RARELY BUT SOMETIMES A PERSON WILL REACH A POINT WHERE THEY REACT WITH A LOT OF DIARRHEA OR NAUSEA. STOP IMMEDIATELY AND WAIT UNTIL THE NAUSEA OR DIARRHEA IS GONE, THEN START AGAIN WITH LESS DROPS PER DOSE, SOMETIMES LESS THAN 1/2 OF WHAT HE WAS TAKING. ALL DOSES SHOULD BE THE SAME, SO IF YOU REDUCE TO, FOR EXAMPLE 9 DROPS ACTIVATED MMS, ALL DOSES SHOULD BE 9 DROPS OF MMS BEING TWICE 1 HOUR APART THREE TIMES A DAY. (THAT'S A TOTAL OF 6 NINE DROP DOSES). REMEMBER, ALWAYS AS MUCH AS THE PERSON CAN STAND WITHOUT GETTING NAUSEOUS OR DIARRHEA.
