

OZONE USES

- 1. Water sanitizing**
- 2. Drinking ozone water kills bacteria & viruses in body. Drink within 1/2 hr. of ozonating the water for maximum effect.**
- 3. Ozonate water with fruits & vegetables in it. This sanitizes and eliminates fertilizer from fruits and vegetables and they will last about 3 mos.**
- 4. Treating ear infection by using Q-tip with hollow tubular stick & connect end to syringe filled with ozone. Inject about 10 ml (cc) in each ear.**
- 5. Treating infections in body by injecting in the rectum using special syringe with elongated nozzle.**
- 6. Insufflation: seal plastic over a wound and inject ozone via elongated syringe then tape closed. This helps wound healing.**
- 7. Ozonate olive oil and refrigerate and it will last for about a year. Use it over dry and irritated skin and gently rub in. Also use on scalp for moisturizing skin and increasing oxygen in the scalp which may promote hair growth.**
- 8. Ozone gas can be used to ozonate a room to eliminate odors but everyone including pets must leave the room. Later after treatment of the room exhaust the remaining ozone in the room via a window fan(s) depending on the size of the room.**
