5000/10000 Watt DC to AC Power Inverter. 24V DC to 110/120V AC

5000/10000 Watt Power Inverter, 24V DC to 110/120V AC. For 24V DC to 110/120V AC with Wireless Remote Control.

Here's a great bargain for you!!! This inverter is made from the same factory as the Coleman brand. The Power Express brand name inverter is much better quality than Coleman brand or the rest of the brand because it comes/improves with the following:

This Inverter comes with:

- 1) Unique WIRELESS Remote Control Switch (Receiver and Transmitter) that you can turn on/off the inverter itself.
- 2) Build-In Bar Graph Displaying both the Voltage and Wattage. You know for sure exactly how much the output is so you can control your inverter on the output of wattage and battery voltage.

Soft Start Technology (SST): Before the introduction of Soft Start, high startup currents from large inductive loads could shut down the inverter. Soft Start improves inverter operation. Major features incorporated in SST include:

1. Gradual voltage ramp-up during inverter startup. This eliminates failed cold starts under load.
2. Output that momentarily dips in voltage and quickly recovers to allow large motorized loads to start. This eliminates almost all shutdowns from momentary overloads.

This power inverter also incorporates a new cooling technology that more efficiently cools the power transistors, and combined with Soft Start, dramatically increases reliability and the life of the product.

Turn your vehicles' battery into multiple AC outlets!

- 5000 watts continuous.
- 10000 watt high surge.
- 24 volt DC to 110-120V volt AC power inverter.

Provides household current from any 24 volt power port. Run power tools and worklights. Run refrigerators and microwaves. Run space heater or cooling fans. Chain Saw, sump pump, power computers, printers, TV, VCR and peripherals and much more.

Here's the formula for all power inverter: Amps x 110 V AC = wattage of inverter

Specifications:

- Max. continuous power: 5000 watt
- Surge capability(peak power): 10000 watt
- Input voltage range: 24V DC nominal (22-30V) operative
- Waveform: Pure Regulation Modified Sine Wave

- Efficiency: 90%
- Frequency: 60Hz +/-2%
- Voltage: 110V AC RMS +/-10%
- Outlets on inverter: 110-120V AC 3 prong grounded
- Wireless Remote control switch (included)

Features:

- Anodized Aluminum Case: Provides durability and maximum heat dissipation.
- High Speed Cooling Fan.
- On/off switch.
- Bar Graph of Battery voltage and Output wattage display
- Ground terminal.
- Two Positive power input terminal.
- Two Negative power input terminal.
- Four Standard North American 3 Prong AC Receptacles.

Safety Protection Features:

- Soft-start system
- Short circuit protection
- Over voltage protection
- Low Voltage Alarm
- Under voltage protection
- Overload protection
- Thermal protection

Please Note: This inverter is for "24 V DC" to "110/120V AC" (if you ordered the wrong item, there will be a 30% restocking fee plus no refund on the shipping/handling charge. You also need to pay shipping to return the product.

We also ship Worldwide. Before ordering, please provide your country information so we can email the shipping/handling cost for you.

We carry 12V/24V DC with 110V/120V/220V/240V AC in all size of power inverter. Please check our website listing for information.

Availability: Usually ships the same business day.
